

ANTIOXIDANTS

THE BEST PROTECTION FROM HARMFUL AIR POLLUTANT

The rate of **air pollution** is rising due to industrialization and urbanization all around the world. Air pollution causes early skin aging, dryness, wrinkles, acne, pigmentation, cellular damage, and hair fall. The rise in health issues caused by air pollution has encouraged both young and elderly population to use antioxidant cosmetics.

The **antioxidant cosmetics** protect the skin from UV rays and other harmful air pollutants. The price of natural antioxidants is very high, which is acting as a restraint to the market of cosmetic antioxidants.

Oxidative stress breaks down **collagen**, hinders skin's natural repair process and triggers inflammation—you see these effects like fine lines, wrinkles, loose skin, acne breakouts and a blotchy skin tone.

By scavenging free radicals, **antioxidants can help prevent and correct these visible signs and give skin a more youthful glow.**

PRODUCTS WHERE TO USE ANTIOXIDANTS

Skincare products

Haircare products

Hand & Nail care products

Lip balms & Lipsticks

Fragrances
