

PRACAXI PROSENSE

CitroBio®
Brazilian Biodiversity

THE FORCE OF NATURE THAT INSPIRES AND REGENERATES!

Acts at molecular level modulating the gene expression of inflammatory cytokines in the skin, Pracaxi ProSense has efficacy tests proving its effectiveness combining Amazonian tradition with applied science for sensitive skin.

Benefits:

Regeneration of skin micro-lesions, minimizes irritations and skin's discomfort, strengthens the skin barrier, preserves hydration and promotes a soft and silky touch.

CLINICAL RESULTS

In 24 hours:

- 46.67% improvement in sensitivity.
- 53.33% skin regeneration.
- 40% improvement in skin flaking

Clinical efficacy in skin with micro-cutaneous lesions

In 15 minutes:

- Reduced skin redness by 66.67%.
- Improved burning sensation by 53.33%.
- Promoted a 66.67% calming sensation after facial waxing.

Clinical Efficacy on Skin After Facial Waxing

IN-VITRO RESULTS

- Reduction of IL-1 and IL-6 gene expression by 61.4%
- Increased keratinocyte proliferation by 21.3%
- Regenerative effect of fibroblast lesions by 78.5% in 24 hours

Evaluation of skin redness after facial waxing
