

Allergen Spray

Use probiotics to reduce allergens in your home!

By adding **active probiotics** to your textile surfaces, this versatile cleaning spray **breaks down common allergens in a 100% biological way** and reduces unpleasant odors. It works wonders on dust mite matter or allergens from cat hair on your bed, sofa, carpet or curtains and makes your living space comfortable and fresh again.

- ✔ Reduces allergens on your textiles
- ✔ Continues to function for days after spraying
- ✔ Removes and prevents unpleasant odors
- ✔ Helps maintain a balanced microbiome on treated surfaces
- ✔ Continuous mist spray bottle ensures even application
- ✔ Made in Belgium with patented HeiQ Synbio technology
- ✔ 180ml bottle

Recommended use:

1. The first week, spray the bed/sofa every day
2. After that, spray only twice a week

Allergies are usually triggered by proteins (allergen carriers). When we spray our Allergen Spray onto a surface, our probiotics produce enzymes that break down proteins, making the allergy triggers disappear. Study results have shown a **60% house dust mite allergens reduction**, over **75% pet allergen reduction** and a close to **90% pollen allergen reduction**.
