

Reduce allergens with synbiotics

What are synbiotics?

HeiQ Synbiotics combine probiotics and prebiotics to deliver effective, sustainable cleaning. This innovative approach supports a balanced indoor environment by reducing allergens and minimizing exposure risks.

Proven allergen reduction

Independent laboratory testing confirms that synbiotics significantly reduce common indoor allergens:

These results demonstrate the product's effectiveness in reducing allergen levels on treated surfaces.

EU Ecolabel alignment

Synbiotics meet key requirements of the EU Ecolabel for hard surface cleaning products, including:

- ✓ **Microorganism safety:** Only non-pathogenic strains (Biosafety Level 1) are used.⁵⁾
- ✓ **Environmental impact:** Probiotics are biodegradable and contribute positively to wastewater ecosystems.
- ✓ **Product effectiveness:** Allergen reduction performance supports the "fitness for use" criteria outlined in the EU Ecolabel framework.⁶⁾
